Effort Reporting

Definition:
Effort is defined as the amount of time spent on a particular activity. It includes the time spent working on a sponsored project in which salary is directly charged or contributed (cost-share). Effort reporting is the mandated method of certifying to the granting agencies that the effort charged or cost shared to each award has actually been completed.
Effort Reporting

Requirements and Parties Involved

- Uniform Guidance sets forth criteria for acceptable methods of charging salaries and wages to federally sponsored projects. It requires a payroll system that directly charges salaries to appropriate projects.

- Uniform Guidance also requires that the University develop a mechanism to determine or confirm how individuals actually expend effort during a specified time period. These effort reports must be performed on a regular schedule and must be certified by individuals who have first-hand knowledge of 100% of the employee’s compensated activities. In most cases, that would be the employee or the direct supervisor of that employee.
SAMtool – Sponsored Award Management Tool

• Rolled out in Fall 2015
• Purpose
  • To provide a tool for financial and budget management of sponsored awards
• Access
  • For Principal Investigators access is automatically granted upon award set up in the PeopleSoft System
  • All other access is attained via a FAST request submitted by your departmental Information Coordinator. All access is based on your role and security access.
• On-going Enhancements
The specific features of the SAMtool are:

- “dashboard” type reporting for chairs, deans and VPR, providing a summary of department, school/college, and University-level sponsored activities by primary investigators (PIs), total sponsored budget, etc.
- at-a-glance summary views for PIs and administrators on awards for which they are responsible
- burn-rate indicators for potential over- or underspending on awards
- ability to drill down from summary data to multiple sublevels of summary data, and to the transaction level while also providing links to source documentation
- ability to categorize financial data to mirror OSP budget template categories, providing intuitive analysis throughout the award lifecycle
- enabling of PIs and administrators to create “what-if” scenarios for project planning, including commitments throughout the grant cycle
- provision of a clean, consistent and concise reporting tool for all sponsored awards
- reduction/elimination of the need for shadow systems
